Product Requirements Document

Prompt Funds — member savings wallet and lending platform

VERSION	DATE	PREPARED FOR	CLASSIFICATION
1	November 2026	Prompt Funds / cooperative lending clients	Confidential

1. Purpose and scope

This document defines **what** Prompt Funds must do for members, staff and the cooperative's management. It is the reference for design, build, testing and acceptance. The Technical Requirements Document (TRD) defines **how**.

Product in one sentence. A mobile-first web platform on which anyone can join a cooperative for free, verify their identity online, save any amount into a personal wallet that earns interest, withdraw to their own bank account, and apply for and repay loans — without visiting an office.

Guiding principle. A member must be able to register for free, deposit money, see the updated balance, withdraw eligible savings and apply for a loan entirely online. Every balance a member sees must be supported by the cooperative's reconciled accounting records.

1.1 Licence boundary (non-negotiable)

The operator is licensed to **lend**, not to provide payment or transfer services. The product therefore:

Allowed	Not allowed (must not be built or exposed)
Members deposit into their **own** wallet via a dedicated account number or approved channel	Member-to-member transfers, "send money", P2P
Withdrawals paid **only** to the member's own, name-verified bank account	Payouts to third-party accounts or arbitrary account numbers
Loan disbursement to the member's own verified account	Bill payments, airtime, merchant payments, cards
Loan repayment from the member's own savings or deposits	Inter-bank transfer features of any kind

The payout account can only be changed through a staff-verified process (see §6.4). This is enforced in code: the payment adapter has no generic "transfer to account" function.

1.2 Out of scope for launch

Native Android/iOS apps (the responsive web app is installable on phones); group/ajo savings; fixed-term deposits; guarantor workflows; credit bureau integration; USSD channel; investment products. These are scheduled in the roadmap (§10).

2. Users and roles

Role	Who	Primary goals
Prospective member	Public visitor	Understand products and rates; join quickly and free
Member	Verified individual	Save, see balances and interest, withdraw, borrow, repay, download statements
KYC officer	Staff	Review identity results; approve or reject memberships
Loan officer	Staff	Assess applications and repayment capacity; recommend

Role	Who	Primary goals
Loan committee	Staff / board delegates	Approve or decline loans (must differ from assessor)
Finance officer	Staff	Approve withdrawals, disburse loans, reconcile
Finance approver	Senior staff	Second approval for large withdrawals (≥ ₦500,000 by default)
Administrator	Operations lead	Configure products/policies, run jobs, manage staff
Auditor	Internal/external	Read-only access to ledger, reports and audit trail

2.1 Personas

- **Amaka, 34, trader in Onitsha.** Saves irregularly from daily sales; wants a safe place that pays something and a quick loan to restock. Uses an Android phone on 3G; distrusts hidden charges.
- **Tunde, 27, salaried in Lagos.** Wants a disciplined savings habit with interest and an emergency loan option without payday-lender abuse.
- **Mrs. Bello, finance officer.** Needs a clear daily queue of withdrawals and disbursements, confidence that the books balance, and an audit trail for examiners.

3. Success metrics

Metric	Target (first 6 months)
Registration → verified member conversion	≥ 60%
Time to complete registration + KYC	Median < 5 minutes
Deposits reflected after provider confirmation	95% within 2 minutes
Withdrawals paid within SLA (1 business day)	≥ 98%
Loan decision time (submission → decision)	Median ≤ 2 business days
Ledger trial balance variance	**Always ₦0.00**
Unreconciled items older than 2 days	0
Portfolio at risk > 30 days (PAR30)	< 5%
Mobile Lighthouse performance score	≥ 85 on mid-range Android

4. Module overview

Module	Launch (MVP)	Later phases
A. Public website	Home, About, Savings, Loans (with calculator), FAQ, Register, Log in	Blog, testimonials, multilingual (Yoruba, Hausa, Igbo, Pidgin)
B. Member portal	Registration, KYC, dashboard, wallet, history, statements, profile, notifications	Push notifications, savings goals, PWA offline mode

Module	Launch (MVP)	Later phases
C. Savings management	Dedicated deposit accounts, webhook crediting, withdrawals with maker-checker, daily interest accrual + monthly credit, reconciliation	Fixed deposits, target savings, auto-save
D. Loan management	Products, online application, automated checks, assessment, committee approval, offer acceptance, disbursement, schedules, repayment from savings, auto-debit, arrears	Guarantors, credit bureau, partial prepayment rebates, restructuring, write-off workflow
E. Administration	Member search & KYC queue, withdrawal queue, loan pipeline, overview KPIs (liquidity, PAR), trial balance, portfolio ageing, audit trail, job runner	Configurable policies UI with maker-checker, regulator report packs, BI dashboards

5. Functional requirements — Public website (A)

ID	Requirement	Priority
A-1	Home page explains the offer, the four-step journey, and shows the current savings rate and loan products **read live from the database**	Must
A-2	Loan calculator: choose product, amount, tenor; shows monthly instalment, total interest, processing fee, total repayable and full schedule	Must
A-3	Savings page discloses rate, accrual method, withdrawal SLA, and that savings are **not NDIC-insured**	Must
A-4	Footer states that the service is for members only and offers no transfers to third parties	Must
A-5	FAQ covers fees, deposits, interest, withdrawals, loans, missed payments, data protection	Must
A-6	Pages are server-rendered with metadata for search engines; product pages revalidate every 5 minutes	Should

6. Functional requirements — Member portal (B)

6.1 Registration

ID	Requirement	Priority
B-1	Register with first name, last name (as on BVN), email, phone, password (≥ 10 chars), and consent to terms/privacy	Must
B-2	**No fee and no deposit** at any point of registration	Must
B-3	Duplicate email/phone rejected with a clear message	Must
B-4	Phone numbers normalised to 234XXXXXXXXXX	Must
B-5	After registration the member is signed in and taken to identity verification	Must

ID	Requirement	Priority
B-6	Phone OTP verification before KYC	Phase 2

6.2 Identity verification (KYC)

ID	Requirement	Priority
B-10	Member enters date of birth, address, BVN (11 digits), optional NIN, and payout bank + account number	Must
B-11	BVN checked electronically against the provider (name + DOB match score stored)	Must
B-12	Payout account name resolved via name-enquiry and matched to the member's name	Must
B-13	BVN stored **encrypted**; a keyed hash prevents the same BVN joining twice	Must
B-14	Members under 18 rejected	Must
B-15	Matched applications go to the KYC queue (or auto-approve when policy allows)	Must
B-16	On approval the system issues a **unique membership number** (`PF-YYYY-NNNNNN`), opens the savings ledger account and wallet, and creates a dedicated deposit account number	Must
B-17	Rejection shows the reason and lets the member resubmit	Must
B-18	Selfie/liveness and document upload	Phase 2

6.3 Dashboard

The dashboard must show, on one mobile screen where possible:

- Total savings balance, **available** balance, pending (held) amount, interest earned to date, interest accrued this month.
- Quick actions: Deposit, Withdraw, Get a loan.
- Loan summary: outstanding balance, next instalment amount and due date (red when overdue), any pending application/offer.
- Latest notifications and the six most recent transactions with status.

6.4 Wallet, history and statements

ID	Requirement	Priority
B-30	Wallet page shows total savings, available, total deposits, total withdrawals, interest rate and interest earned	Must
B-31	Deposit panel shows the member's dedicated bank, account number and account name	Must

ID	Requirement	Priority
B-32	Withdrawal form shows available balance and the destination account (masked) and SLA	Must
B-33	Withdrawal list with status (pending approval, processing, paid, rejected, failed + reason)	Must
B-34	Transaction history filterable by type, keyset-paginated, newest first	Must
B-35	Statement download (CSV) for any date range; PDF statement	Must / Phase 2
B-36	Changing payout account requires staff verification and a 24-hour cooling-off before the first payout	Phase 2

6.5 Notifications

In-app notifications for: verification outcome, deposit received, withdrawal paid/declined/failed, loan received/approved/declined/disbursed, repayment received, overdue, interest credited. SMS and email delivery for the same events in Phase 2 (Termii/Resend).

7. Functional requirements — Savings management (C)

7.1 Deposits

ID	Requirement	Priority
C-1	Each verified member has a dedicated virtual account (Paystack DVA or equivalent)	Must
C-2	Provider webhook is signature-verified, re-verified against the provider API, and **idempotent** on provider reference	Must
C-3	A confirmed deposit posts a balanced ledger entry (Dr Bank-Collections, Cr Member Savings) and updates the cached wallet in the same database transaction	Must
C-4	Deposits with unknown account numbers are parked for manual reconciliation, never lost	Must
C-5	Daily reconciliation compares provider settlement report to ledger; differences become reconciliation items that must be resolved	Must (job) / Phase 2 (UI)
C-6	Sandbox “simulate deposit” only when `DEMO_MODE=true`	Must

7.2 Withdrawals

ID	Requirement	Priority
C-10	Member requests any amount ≤ available balance; the amount is **held** immediately (row lock prevents double-spend)	Must
C-11	Requests are idempotent (double-tap safe)	Must

ID	Requirement	Priority
C-12	Blocked while the member has a loan in arrears	Must
C-13	Finance officer approves (maker ≠ checker); ≥ ₦500,000 requires Finance Approver	Must
C-14	Payout goes only to the verified own account; on success Dr Member Savings / Cr Bank-Payouts and the hold is released	Must
C-15	On provider failure or reversal the hold is released and the member notified	Must
C-16	Target SLA: paid within 1 business day; queue shows age of each request	Must

7.3 Interest on savings

ID	Requirement	Priority
C-20	Rate, day-count basis, minimum eligible balance and effective date are held in versioned **interest policies** (history never edited)	Must
C-21	Daily accrual on end-of-day balance: `balance × rate ÷ dayCount`, stored in micro-kobo to avoid rounding loss	Must
C-22	Month-end credit: accrued amounts rounded half-to-even to kobo and posted (Dr Interest Expense, Cr Member Savings)	Must
C-23	Jobs are idempotent (unique per member per day) and resumable	Must
C-24	Dashboard shows interest earned and accrued-not-yet-credited	Must

8. Functional requirements — Loan management (D)

8.1 Loan lifecycle

`Submitted → Under assessment → Approved (offer) → Offer accepted → Active → Closed`, with branches to **Declined**, **In arrears** and **Written off** (Phase 2).

ID	Requirement	Priority
D-1	Products define min/max amount, min/max tenor, annual rate, method (reducing balance or flat) and processing fee	Must
D-2	Application captures product, amount, tenor, purpose, monthly income and monthly expenses; shows the live schedule before submission	Must
D-3	One open loan or application per member	Must
D-4	Automated checks displayed to the officer: KYC approved, membership age, no other open loan, instalment ≤ 40% of disposable income, amount ≤ 3× savings, savings history	Must

ID	Requirement	Priority
D-5	Loan officer records assessment notes (maker); committee approves (checker) — **the same person cannot do both**	Must
D-6	Decline requires a reason that is shown to the member	Must
D-7	Member must explicitly accept the offer (key facts: amount, fee, rate, instalment, total repayable, schedule, auto-debit consent)	Must
D-8	Finance disburses the net amount (principal – fee) to the verified own account; approver ≠ disburser	Must
D-9	Disbursement posts Dr Loans Receivable (principal) / Cr Bank-Payouts (net) / Cr Fee Income (fee) and generates dated instalments	Must
D-10	Member can repay any amount from available savings; allocation is **oldest instalment first, interest before principal**	Must
D-11	Daily job auto-collects due instalments from available savings, then flags instalments overdue after a 3-day grace period and moves the loan to arrears	Must
D-12	Loan closes automatically when all instalments are paid	Must
D-13	Ethical recovery: no contact-list access, no public shaming, reminders only to the member	Must
D-14	Early settlement quote, restructuring, write-off with provisioning	Phase 2
D-15	Credit bureau check and bank-statement analysis (e.g. Mono)	Phase 3

9. Functional requirements — Administration (E)

ID	Requirement	Priority
E-1	Overview KPIs from the ledger: active members, KYC queue, member savings liability, cash at bank, liquidity cover %, loans receivable, loan pipeline, PAR %, trial balance variance (red if ≠ 0)	Must
E-2	Member search by name, phone, email or membership number (trigram index) with KYC actions	Must
E-3	Withdrawal queue with dual-approval flag; approve-and-pay or reject with reason	Must
E-4	Loan pipeline tabs: to assess, committee, to disburse, active book, arrears, closed	Must
E-5	Loan detail: application, automated checks, decision actions per role, schedule, history	Must
E-6	Reports: income vs expense, trial balance (member accounts rolled up), portfolio ageing buckets	Must
E-7	Operations: run accrual / credit / arrears jobs on demand; view current policy	Must

ID	Requirement	Priority
E-8	Audit trail: hash-chained, filterable by entity	Must
E-9	Role-based access on every action; auditor read-only	Must
E-10	Exports (CSV/XLSX) for all reports; regulator/board report pack	Phase 2
E-11	Staff MFA (TOTP)	Must before go-live

10. Non-functional requirements (summary)

Area	Requirement
Mobile	Designed for 360 px wide screens first; 48 px touch targets; works on 3G; bottom navigation
Performance	Dashboard server response < 500 ms p95; first load < 200 KB JS for member pages
Availability	99.5% monthly for member portal; scheduled maintenance announced 48 h ahead
Security	OWASP ASVS L2; encryption in transit and at rest; field-level encryption for BVN/NIN; session cookies httpOnly + SameSite
Privacy	Nigeria Data Protection Act 2023 compliance; consent capture; data minimisation; DPO named
Accuracy	Integer kobo arithmetic only; double-entry ledger; zero trial-balance variance
Auditability	Every state change audited with actor, time, before/after
Accessibility	WCAG 2.1 AA

11. Roadmap

Phase	Contents
1 — Savings launch	Public site, registration, KYC, wallet, deposits, withdrawals, interest, admin, reconciliation
2 — Digital lending	Loan products, applications, assessment, approval, disbursement, repayments, arrears (code already included; activated after core is stable)
3 — Engagement	SMS/email/WhatsApp notifications, PDF statements, savings goals, PWA install, referral programme
4 — Scale	Native apps (React Native) once volume justifies; credit bureau; guarantors; USSD; BI dashboards

12. Regulatory dependencies before go-live

1. Confirm cooperative registration and that savings are taken **from registered members only**.

2. Confirm the lending licence covers digital lending; register with the **FCCPC** under the Digital, Electronic, Online or Non-Traditional Consumer Lending Regulations 2025 before launching digital loans (new entrants must obtain approval before launch).
3. NDPA 2023 compliance: privacy notice, lawful basis, DPIA, data processing agreements with KYC, SMS and payment vendors.
4. Board-approved savings, withdrawal, lending, provisioning, liquidity and investment policies; the rates seeded in the system are placeholders.
5. Written confirmation from the payment partner that the integration (dedicated accounts + own-account payouts) fits the cooperative's licence.

13. Acceptance criteria (launch)

- A new member can register, verify, receive a membership number and deposit account in under 5 minutes on a mid-range Android phone.
- A test deposit via provider sandbox appears on the dashboard within 2 minutes and in the ledger as one balanced entry; replaying the webhook changes nothing.
- A withdrawal cannot exceed the available balance even with two simultaneous requests.
- Accrual and credit jobs produce interest that matches an independent spreadsheet to the kobo for 100 sample wallets.
- Loan schedule principal sums exactly to the amount disbursed; repayments allocate interest before principal.
- The trial balance is ₦0.00 after the full UAT script; every action in the script appears in the audit trail.
- Penetration test finds no high or critical issues outstanding.
