Prompt Funds — screen map, user journeys and money flows

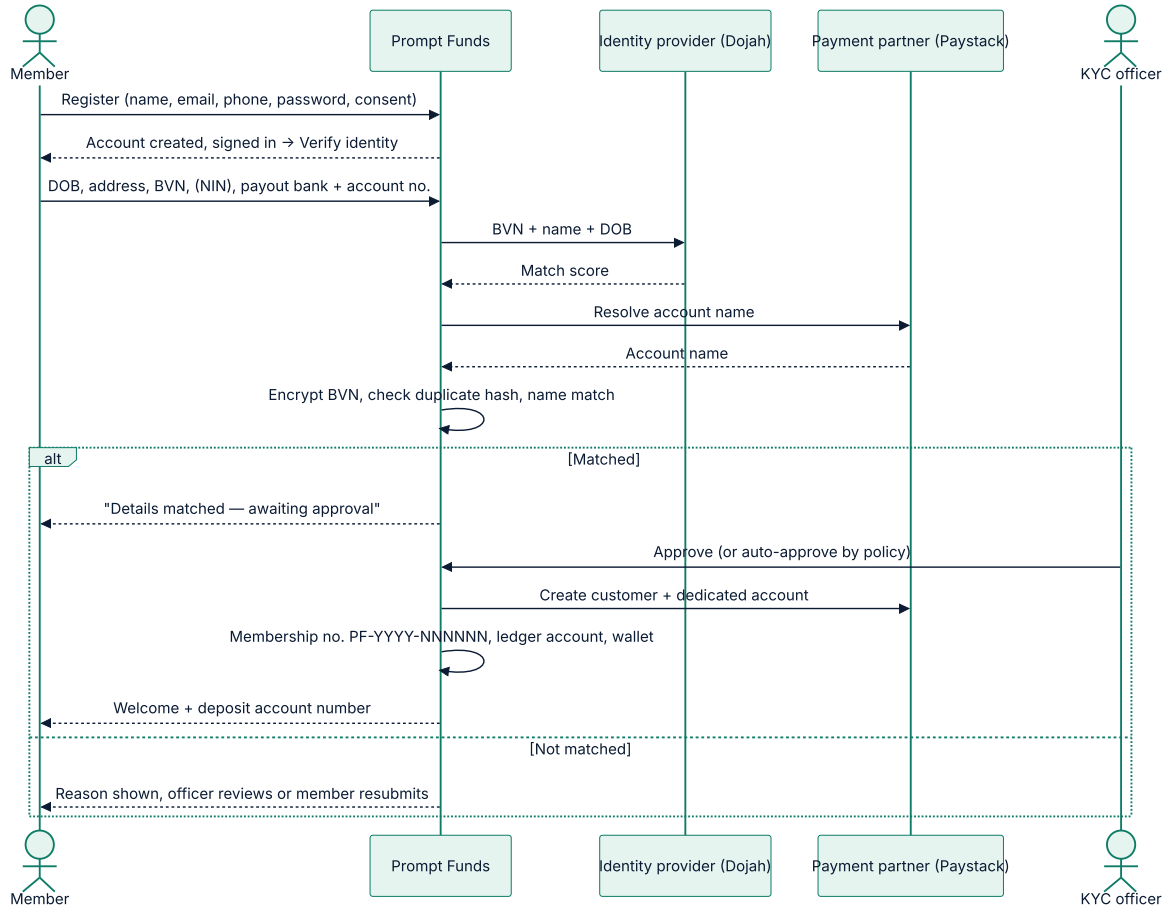

VERSION	DATE	PREPARED FOR	CLASSIFICATION
1.0	November 2026	Prompt Funds / cooperative lending clients	Confidential

1. Screen map

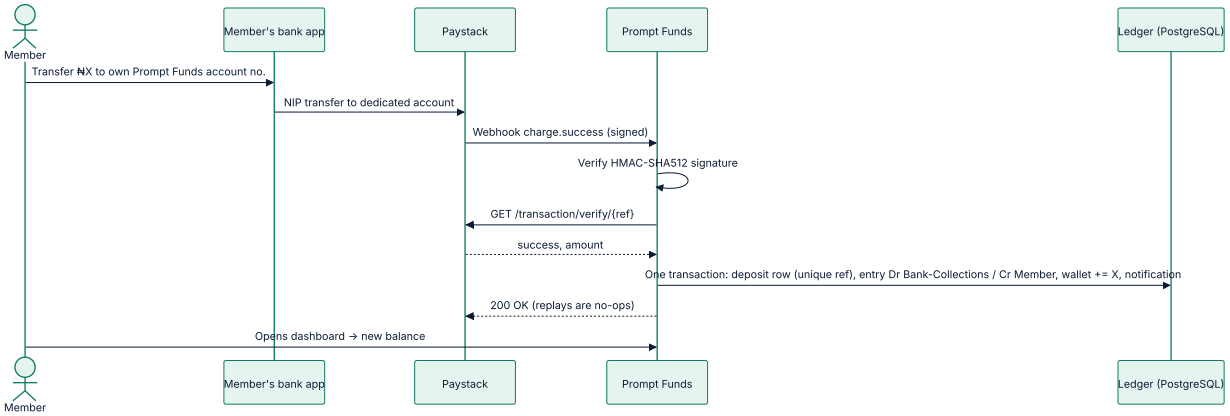

The member portal uses a **bottom navigation bar** on phones (Home · Savings · Loans · History · Profile) and a top tab bar on larger screens. Until identity is approved, members only see the verification screen.

2. Journey 1 — Join and verify

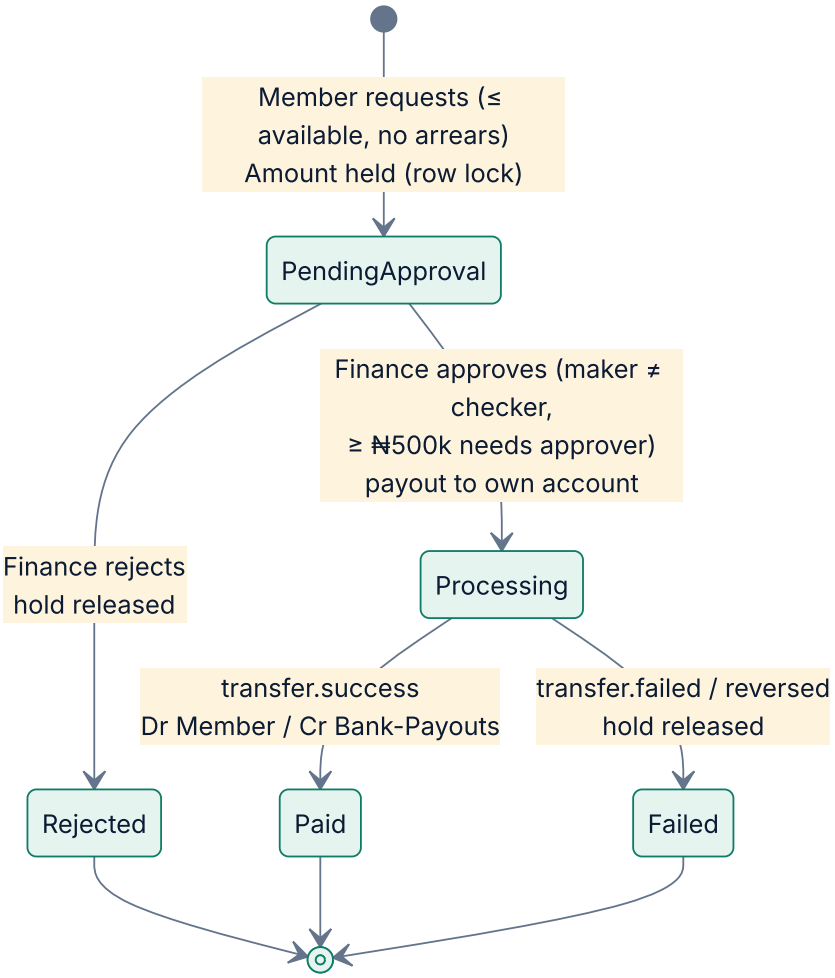

Rules: free at every step; one membership per BVN; must be 18+; payout account must be in the member's own name.

3. Journey 2 — Deposit

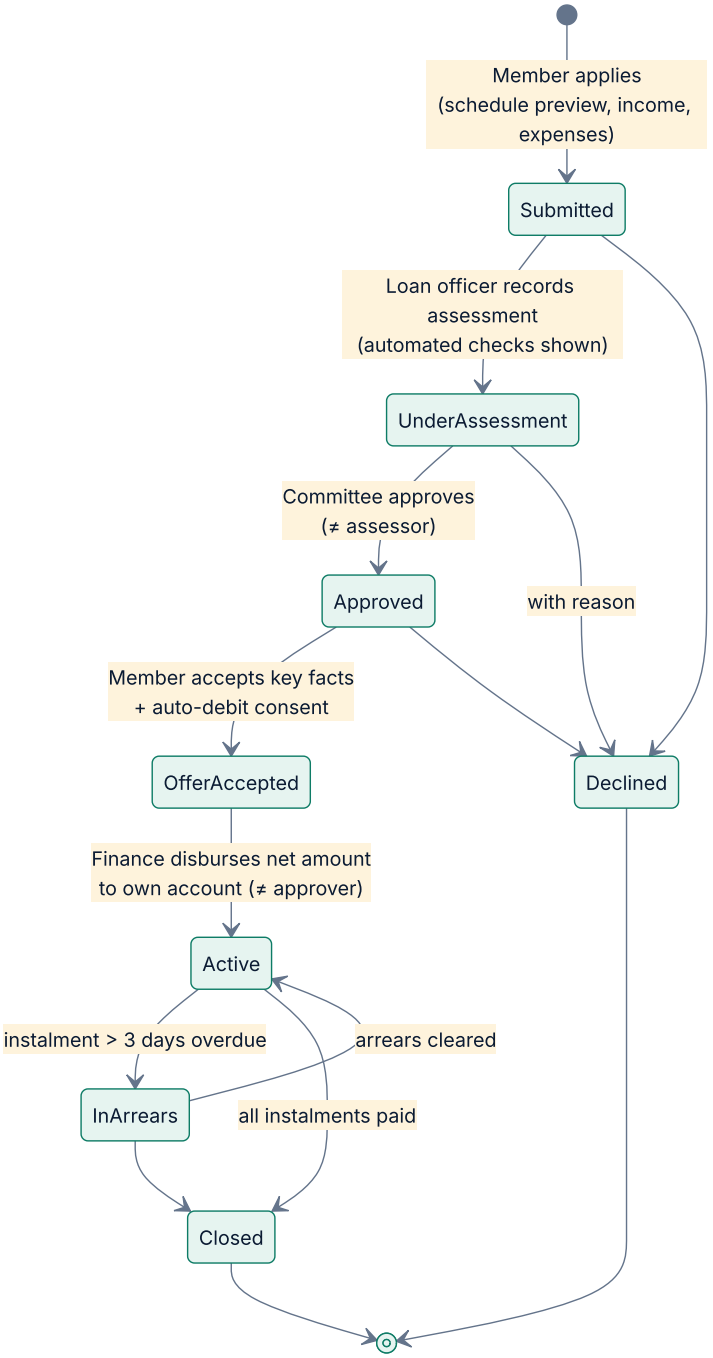

4. Journey 3 — Withdraw

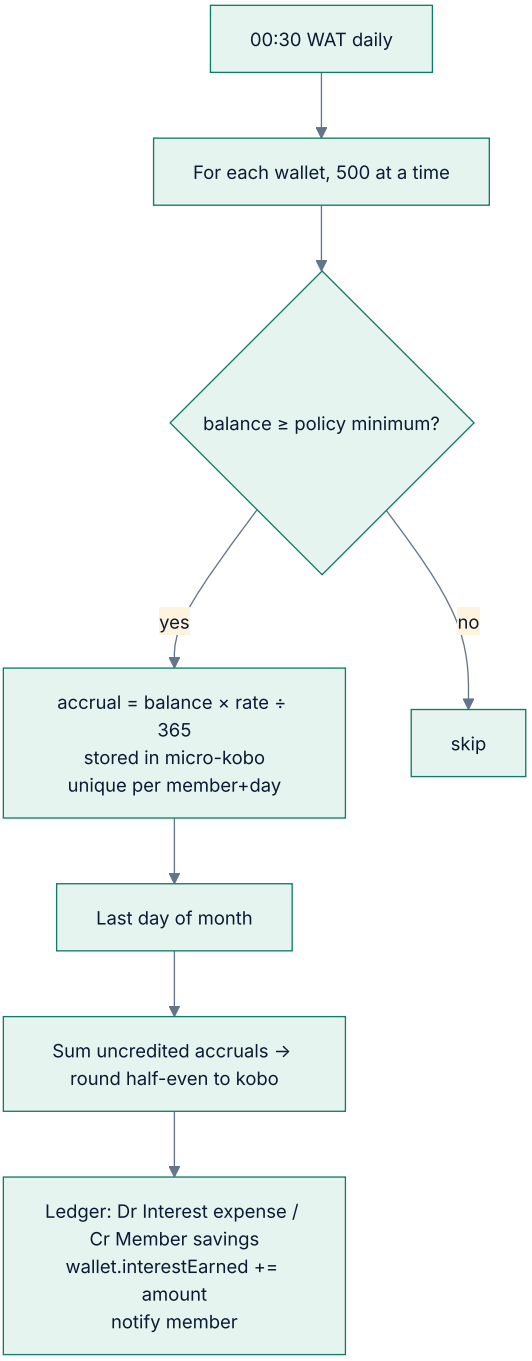

Target: paid within **1 business day**. The member sees the status on the wallet page and gets a notification at each outcome.

5. Journey 4 — Loan

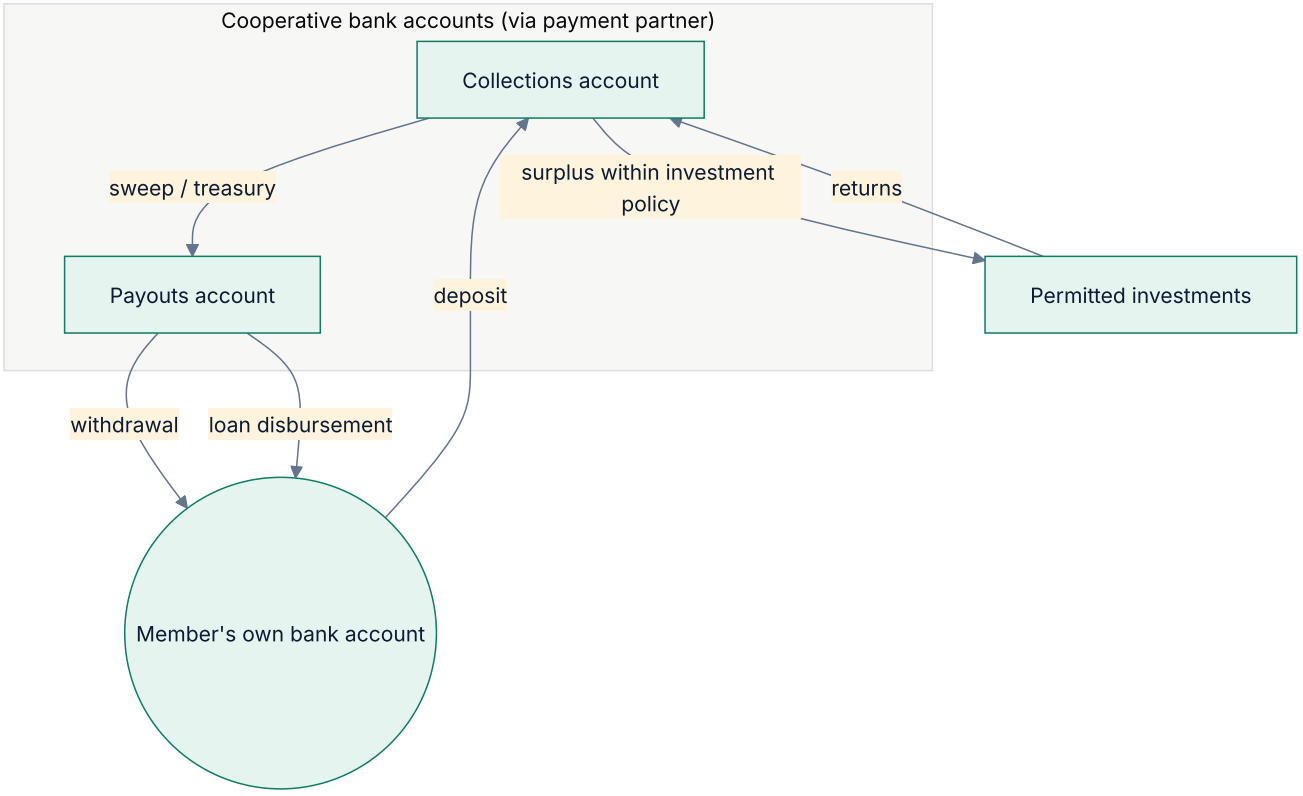

Repayment: any time from the loan page (from savings), and automatically each night for due instalments if savings are available. Allocation: oldest instalment first, interest before principal.

6. Journey 5 — Interest

7. Money flow between accounts

Liquidity rule: the finance team keeps enough in the payouts account to cover pending withdrawals plus expected disbursements; the admin overview shows **liquidity cover** (cash at bank ÷ member savings) and flags it red below 20%.

8. Staff daily routine

Time	Who	Screen	Action
08:00	Finance	Overview	Check trial balance = ₦0, liquidity cover, overnight job results
08:15	Finance	Operations / Reconciliation	Resolve unreconciled deposits from the provider report
09:00 – 16:00	KYC officer	Members & KYC (queue)	Approve / reject verified applicants
09:00 – 16:00	Finance	Withdrawals	Approve & pay; escalate ≥ ₦500k to approver
10:00	Loan officer	Loans → To assess	Assess new applications
Weekly / as needed	Committee	Loans → Committee	Approve / decline
Daily	Finance	Loans → To disburse	Disburse accepted offers
Weekly	Collections	Loans → Arrears	Member outreach (respectful, member only)

Time	Who	Screen	Action
Month-end	Finance / Auditor	Reports	Trial balance, income vs expense, PAR ageing, board pack

9. Error and edge states

Situation	What the member sees	What the system does
Deposit to an unknown account number	Nothing (not their account)	Parked in reconciliation for staff
Webhook delivered twice	One deposit	Unique provider reference → no-op
Two withdrawals tapped at once	One request	Idempotency key + wallet row lock
Withdrawal while in arrears	“Please clear your overdue repayment first”	Request refused
Payout fails at the bank	“Withdrawal not completed — money is back in your available balance”	Hold released, audit + notification
BVN already used	“This BVN is already linked to another membership”	Rejected before any record is changed
Payout account name mismatch	“An officer will contact you”	KYC stays in manual review
Loan disbursement transfer fails	Offer remains accepted	Reversal entry; instalments removed; finance retries
Session expired	Sent to log in	Server-side session check on every page
